## Pricing

There is no price guarantee or price protection. New list prices will be used for calculating additional users and support fees.

'User' is defined as the number of licensed Microsoft Dynamics GP System users (active full allowed user count).

## Adding Users

Prices are based on the new total number of users. For example, 23 users are initially purchased based on the 'Up to 25' user category price. By adding three more users, you will be quoted a new per user price for three new users based on the 'Up to 50' user category price.

## Annual Support Plan

A support plan for Merit GP Products is required for the first year and automatically recurs annually. The plan provides software updates including enhanced functionality and compatibility with new releases of Microsoft Dynamics GP.

The support plan is based on 20% of full list price of modules and users at the time of purchase and at the time of each renewal. The annual support plan includes six annual support incidents for Merit GP Products. Support incidents include break-fix (replicable bugs) issues and installation/upgrade instructions only and can be submitted directly by emailing [support@meritsolutions.com](mailto:support@meritsolutions.com). Support incidents do not include training, consulting, or how to configure or use Merit GP Products.

To reactivate an expired support plan, you will be charged 20% of the active support price as a re-instatement fee. In addition, all unsettled support charges for previous year(s) must be paid to reactivate Merit support.
